Cleaning Guidelines

- Glass: Use a soft cloth and warm soapy water; rinse off thoroughly.
- Metallic Surfaces: Use a soft cloth and warm soapy water; rinse off thoroughly.
- Do not use "Spray & leave" cleaning products on the metal surface as these will cause damage to your product. These include acidic based cleaning products, bleaches, solvents or abrasive pads.
- In hard water areas, regular cleaning of your Flair door will help to prevent the build-up of limescale. Stubborn deposits of limescale can be removed with warm soapy water.
- Check your shower door for functionality periodically. Ensure that the wheel track is free from any grit / dirt which may have collected over time.

Installation

Full installation instructions are provided with each product to ensure correct installation. All Shower doors and wetroom panels are adjustable between the dimensions stated. All dimensions are approximate.

Shower Tray Installation

All shower trays must be installed as per instructions supplied. Install on a base of fine sand, cement and cement additive. Please note: Silicone sealants, foams, mastics, installation compound adhesive or similar must not be used as a substitute for cement. Ensure shower tray is 100% level and water test to ensure water is draining correctly. If not satisfied at any stage do not proceed with fitting. Fitting of Shower Tray is acceptance of quality.
