THE PANNELLING SOLUTION

Waterproof

Durable

Reliable

Dark Basalt + Pale Marble |PVC | 10mm

Why choose ELKOR ?

ELKOR PVC panelling provides a fully waterproof, tile-free solution that installs quickly with no trades required. With a wide choice of colours and decors for walls and ceilings, it's easy to complement any interior scheme.

Choice

ELKOR gives you a versatile, affordable alternative to tiles with a wide range of finishes, ideal for both commercial and residential projects. Panels complement any scheme or brassware selection, delivering clean, modern results.

Flexibility

Suitable for walls, ceilings and floors, ELKOR panels come in a range of depths with a variety of trim options, allowing you to achieve a tailored look for any project. As a fully waterproof alternative to tiles, they install quickly and cleanly with no requirement for specialist trades.

Durability

Not only are our panels 100% waterproof and offer excellent insulation and soundproofing but they are easy to clean without the use of harsh chemicals. This ensures they maintain their quality + durability. Looking better and lasting longer!

NOTE | Images are for illustrative purposes only. Due to limitations in colour printing production, slight variations in colour may occur between products produced at different times. To maintain consistency across panels of the same colour, it is advised to order a sufficient quantity with your initial purchase. Additionally, due to the nature of the printing process, our PVC panels do not form a continuous pattern.

Choosing Your Colour

Designed with both style and quality in mind, our PVC panels create a sleek and attractive overall look. Similar to marble tiles, our panels do not form a continuous pattern due to the printing process. For larger areas, we recommend selecting the following decors, which offer a more consistent overall appearance: **Soft Speckle, Pearl White, Honed Silver, and Dark Stone Grey.**

Alternatively, panels can be arranged and positioned prior to installation to achieve the most cohesive look. Taking time to plan your layout in advance will help ensure a more uniform and refined finish.

Complement Your Style

When selecting the PVC colour and style for your bathroom, it's important to consider the brassware style and finish as well. ELKOR offers a selected range of colours that work well with many brassware options, and we've included some ideas to help inspire you as you create your ideal bathroom.

MATT | Greys + Colour

PALE MARBLE

Code | ELKP10PMM

A soft white décor with gentle grey veining, offering a fresh, elegant marble look suitable for light, modern interiors.

SMOKED QUARTZ

Code | ELKP10SQM

A dramatic blend of smoky greys, soft whites, and darker accents that creates a bold, contemporary stone effect.

HONED SILVER

Code | ELKP10HSM

Mid-to-dark greys with a smooth, weathered texture, delivering a refined industrial style with understated character.

MOONSTONE

Code | ELKP10MSM

A calm combination of soft greys and delicate white veining, ideal for creating a serene and modern aesthetic.

GRANITE DRIFT

Code | ELKP10GDM

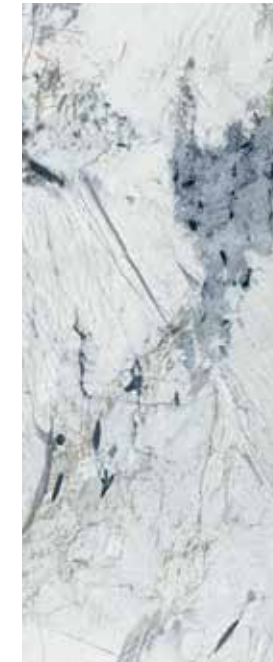

White and grey tones with flowing veining and subtle taupe undertones, creating a sophisticated and timeless stone appearance.

DARK STONE GREY

Code | ELKP10DSGM

A deep grey décor featuring natural stone variations that add depth and texture for a strong, contemporary look.

GLACIAL ROCK

Code | ELKP10GRM

A striking mix of icy whites, cool greys, subtle blue tones, and touches of gold veining, creating a bold pattern inspired by natural stone formations.

DARK BASALT

Code | ELKP10DBM

Deep charcoal and dark grey tones with bold veining, creating a dramatic stone effect with a strong, contemporary presence.

CEILING PANELS ARE FITTED WITH 5MM TRIM OPTIONS. SEE PAGE 20.

Fitting, Cleaning & Maintenance

Please check **pack/batch numbers** when buying your decorative panelling, to ensure consistency of panel colour.

Do not expose to **direct sunlight**, or temperatures in excess of 60°C.

When **fitting lighting** to a ceiling panel, consult the lighting manufacturer.

The hardwearing surface can be hygienically cleaned with a mild, non-abrasive antibacterial cleaner.

NOTE | Images are for illustrative purposes only. Due to limitations in colour printing production, slight variations in colour may occur between products produced at different times. To maintain consistency across panels of the same colour, it is advised to order a sufficient quantity with your initial purchase. Additionally, due to the nature of the printing process, our PVC panels do not form a continuous pattern.

Installation Advice

SCAN HERE FOR
FULL INSTRUCTIONS

The light weight, wipe clean panels are quick and easy to install, the patented tongue and groove system means no grout or specialist trades are required, the panels are 100% waterproof.

STEP - BY - STEP

1. Measure all trims, fit the internal corner first, and stick base seals to the tray if in a shower enclosure.
2. Check wall condition and level, then measure panels twice and cut once.
3. Dry-fit each panel to ensure a correct fit before fixing.
4. Apply ELKOR sealant and adhesive to trims and panel backs, fix panels to the wall. Add ELKOR sealant and adhesive to the groove of the panel, then insert the tongue of the next panel into the groove and continue in the same manner.
5. Seal all joins and base seals fully and use appropriate trims to finish all corners and exposed ends, before installing the shower door.

Understanding Trim Options

Choosing the right trims not only completes the look of your PVC installation but also enhances its durability.

We offer a range of trims suitable for all corners and edges to ensure a professional finish. The accompanying image shows which trim is used in each part of the room so you can select the correct profile for every section of your installation.

Our lightweight, wipe-clean PVC panels feature a patented tongue-and-groove system that requires no grout or specialist trades.
