AYO

**Grazie per aver acquistato il pannello
girevole per installazione con il box
doccia walk in AYO da Flair Showers Ltd.**

Siamo certi che potrete trarre il massimo vantaggio dal nostro prodotto negli anni a venire. La nostra gamma AYO offre cura artigianale e affidabilità assoluta.

La tua stanza da bagno è una faccenda privata
- il box doccia AYO aggiungerà un senso di arricchimento e divertimento alla tua vita.

Un mix perfetto di funzionalità e design –
Designed for Life

The logo consists of the letters 'IT' in a white, bold, sans-serif font, centered within a solid blue square.

QUALITÀ GARANTITA

Una dedizione assoluta alla qualità del prodotto.

I box doccia walk in AYO sono coperti da una garanzia a vita contro difetti di produzione. Tale garanzia è valida a condizione che l'installazione e la manutenzione del prodotto vengano effettuate seguendo le istruzioni di montaggio specifiche e una normale prassi di utilizzo.

I componenti che non contengono vetro e quelli asportabili, quali ad esempio cuscini, guarnizioni, ecc., sono soggetti a normale usura e sono coperti da una garanzia della durata di 12 mesi dalla data d'acquisto.

Ti preghiamo di compilare il certificato di garanzia presente nell'imballaggio oppure di registrarti online tramite www.flairshowers.com/register.

Tutti i prodotti Flair sono omologati CE e realizzati conformemente ai sistemi di garanzia di qualità ISO 9001:2000. Il vetro è temperato e prodotto in conformità alla norma EN 12150. I prodotti Flair vengono sottoposti a una serie di test in base alla norma EN 14428, in cui vengono rispettati gli standard più stringenti del settore sanitario.

SERVIZIO POST VENDITA

Flair si impegna nell'offrirti un'eccellente servizio customer care.

Forniamo una completa gamma di pezzi di ricambio per ogni nostra collezione e mettiamo a disposizione specialisti post-vendita per assistervi con eventuali problemi.

Contatta il servizio clienti al + 39 0287368301 oppure assistenzaclienti@flairshowers.com

INSTALLATION & MAINTENANCE

INSTALLATION TIPS

It is the responsibility of the installer to ensure that the product is installed correctly and due care is given to the instructions.

Your guarantee is invalid if the instructions have not been followed correctly.

- Please check for all visual defects on the product before installation - such defects will not be accepted after installation of the product
- For shower enclosures a spirit level should be used to ensure your shower tray is level - if the shower tray is not level your shower door will not fit
- Ensure vertical wall profiles are level and are an equal distance in from the tray
- Ensure adjustment at wall profiles are equal at both side and that all screws are fully tightened
- Ensure hinges are level and securely fitted to the glass
- Ensure magnets are the right orientation are attracting rather than repelling
- Ensure silicone is used to waterproof your shower enclosure
- Care must be taken during assembly. Flair will not take responsibility where incorrect assembly results in undue stress being put on any of the glass components in this product
- If there are any manufacturing problems please call Flair Service Line on +353 42 966 8000

Note: If the problem has been caused by poor installation, there will be an initial call-out charge for our technical engineer and subsequent charges to the end user "to fix" a problem caused by poor installation.

CLEANING

ClearVue glass coating is a standard feature on all AYO walk-in enclosures. This easy to clean glass coating is applied to the glass surface and ensures that soap deposits and lime scale are easily cleaned off the glass.

- Glass:** Use a soft cloth and mild detergent, rinse off thoroughly*
- Metallic Surfaces:** Use a soft cloth and warm soapy water*
- Painted Surfaces:** Use a soft cloth & mild detergent, rinse off thoroughly*

*Do not use "Spray & leave" cleaning products on the metal surface as these will cause damage to your shower door. These include acidic based cleaning products, bleaches, solvents or abrasive pads. These will damage the anodising layer on the aluminium profiles.

*In hard water areas, regular cleaning of your Flair door will help to prevent the buildup of limescale. Stubborn deposits of limescale can be removed with the use of a mild limescale remover.

*Only use detergents, cleaners and limescale removers with a pH of 5-8.

*The constant use of detergents will degrade the finish of the product over time if not thoroughly rinsed off.

MAINTENANCE TIPS

- Check your shower door for functionality periodically
- Ensure that the wheel track is free from any grit/dirt which may have collected over time
- Lubricate the wheel systems and track using a suitable fine lubricant spray or grease every 6 months.
- Only use non-abrasive cleaning agents on all Flair products and rinse off thoroughly.
- Do not use excessive force when opening and closing your shower door as this could result in shattering
- Do not hang from your shower door or shower door handle - it is not designed to support excessive weight.

INSTALLATION ET MAINTENANCE

CONSEILS POUR L'INSTALLATION

L'installateur doit assurer que le produit est installé correctement selon les instructions de montage.

La garantie ne pourra être prise en compte si le produit n'a pas été installé correctement.

- Merci de ne vérifier aucuns défauts visuels sur le produit avant l'installation - tels défauts ne seront pas acceptés après l'installation.
- Pour les parois de douche, il faut utiliser un niveau de mesure pour assurer que le receveur est installé à plat et de niveau.
- Positionner les profils verticaux muraux à une distance égale du bord extérieur du receveur.
- Assurer que les profils verticaux muraux soient d'aplomb et que toutes les vis soient bien serrées.
- Assurer que les charnières sont de niveau et bien fixées sur le verre.
- Assurer que les aimants sont montés correctement (à savoir attirer plutôt que de repousser)
- Sceller la porte de douche avec du silicone pour assurer l'étanchéité.
- Il faut faire attention en montant le produit. Dans le cas où l'installation d'une paroi de douche serait contraire à ces instructions de montage, Flair Showers ne peut accepter de responsabilité pour tous dégâts ou perte importante.
- Attention: Les bords des panneaux de verre sont vulnérables, à manipuler avec précaution sur des surfaces dures pour éviter des ruptures de verre.
- Pour des défauts de fabrication, contactez-nous au: 00 353 42 96 94436

NOTA : Des problèmes causés par une mauvaise installation peuvent être fixés par notre ingénieur MAIS les frais encourus doivent être payés par le client

NETTOYAGE

Le revêtement du verre ClearVue est une fonction standard de tous les panneaux WALK-IN AYO. Ce revêtement du verre facile à nettoyer est appliqué sur la surface du verre et assure un nettoyage facile des dépôts de savon et de calcaire.

Verre : Utilisez un chiffon et un détergent doux, rincer abondamment.*

Surfaces métalliques: Nettoyez avec un chiffon doux et de l'eau savonneuse tiède.*

Surfaces peintes : Nettoyez avec un chiffon doux et un détergent liquide neutre. Rincez abondamment.*

*N'utilisez pas de produits sans rinçage sur les surfaces métalliques, car cela risque d'endommager le panneau de douche.

Ceux-ci comprennent des produits de nettoyage avec des bases acides, décolorants, des solvants ou des gommages abrasifs. Ceux-ci peuvent endommager la couche d'anodisation sur les profilés en aluminium.

*Dans les zones ayant eau calcaireuse, nettoyage régulier de la porte de douche aidera à prévenir l'accumulation de dépôts calcaires. On peut enlever les dépôts obstinés de calcaire avec l'utilisation d'un produit détartrant doux.

*Utilisez uniquement des produits de nettoyage avec un pH de 5-8.

*L'utilisation constante de détergents dégradera la finition du produit au cours du temps si on ne rince soigneusement.

CONSEILS DE MAINTENANCE

- Vérifiez régulièrement le bon fonctionnement de votre porte de douche.
- Vérifiez que le rail est exempt de salissures accumulées au fil des saisons.
- Graissez les roulettes et le rail avec un vaporisateur de lubrifiant tous les six mois.
- Utilisez seulement des nettoyeurs non-abrasifs sur les produits Flair et rincez bien.
- Évitez d'ouvrir et de fermer la porte de la douche avec une force excessive pour éviter des bris de verre.
- Évitez de vous suspendre sur la porte ou le poignet. Ils ne sont pas conçus pour supporter des poids excessifs.

INSTALLAZIONE E MANUTENZIONE

CONSIGLI DI INSTALLAZIONE

È responsabilità dell'installatore assicurare che il prodotto venga montato correttamente nel rispetto delle istruzioni.

La garanzia è nulla se il prodotto è stato installato non rispettando le istruzioni di montaggio.

- Siete pregati di verificare che non ci siano difetti visibili all'occhio prima di procedere con l'installazione, ogni reclamo pervenuto una volta che il prodotto è stato installato non verrà accettato.
 - Verificare che il piatto doccia sia perfettamente in bolla altrimenti la doccia non potrà essere installata.
 - Assicurarsi che le pareti siano livellate e ci sia la stessa distanza dal piatto doccia.
 - Assicurarsi che la regolazione nei profili sia uguale in entrambe le parti e che tutte le viti siano avvitate completamente.
 - Assicurarsi che i cardini siano livellati e montati correttamente sul vetro.
 - Verificare che i magneti siano nella direzione corretta, cioè si dovrebbero attrarre non il contrario.
 - Usare silicone per assicurare la porta doccia contro le fuoriuscite d'acqua.
 - Maneggiare con estrema cura durante l'installazione, Flair non si prende nessuna responsabilità in caso di rottura del vetro a causa di pressioni su di esso in questa fase.
 - Caso di difetti di produzione, contatti il numero +39 0287368301 oppure rivolgersi a assistenzaclienti@flairshowers.com.
- N.B.:** in caso di problemi/ disagi provocati da un'installazione sbagliata verrà addebitata una commissione per le spese di gestione.

PULIZIA

Il rivestimento ClearVue viene offerto come standard per tutti i box doccia walk in AYO. Tale rivestimento, facile da pulire, viene applicato alla superficie del vetro, assicurando in tal modo la rimozione di depositi di sapone e calcare senza fatica.

- | | |
|-----------------------|---|
| Vetro: | Utilizzare un panno morbido e un detersivo neutro, infine risciacquare con cura.* |
| Superfici metalliche: | Utilizzare un panno morbido e acqua tiepida insaponata.* |
| Superfici dipinte: | Utilizzare un panno morbido e un detersivo neutro, infine risciacquare con cura.* |

*Non utilizzare prodotti che non richiedono il risciacquo sulle parti metalliche per non causare danni alla porta della doccia. Da evitare: detersivi acidi, candeggina, solventi o spugne abrasive che potrebbero danneggiare la superficie esterna dei profili d'alluminio.

*Nelle zone caratterizzate da acqua dura, si consiglia di pulire la porta della doccia regolarmente per evitare l'accumulo di calcare. Utilizzare un anticalcare non aggressivo per rimuovere i residui particolarmente ostinati.

***UTILIZZARE SOLO DETERSIVI PER LA PULIZIA OPPURE ANTI-CALCARE CON PH 5-8.**

*L'utilizzo frequente di detersivi comporterà, nel tempo, la perdita della brillantezza dell'alluminio se non viene risciacquato abbondantemente.

CONSIGLI PER LA MANUTENZIONE

- Verificare periodicamente la funzionalità delle porte doccia
- Assicurarsi che il binario di scorrimento sia privo di sporcizia.
- Ogni 6 mesi sarebbe raccomandabile lubrificare il binario di scorrimento.
- Non effettuare troppa pressione nell'apertura o nella chiusura della porta in quanto questo potrebbe risultare nella rottura del vetro.
- Utilizzare esclusivamente detersivi non abrasivi e risciacquare con cura.
- Non appoggiarsi alla maniglia della porta doccia, questa non è stata disegnata a sostenere troppo peso.
